Six-domain profile

Your score
Group average — Not available
Target

Scale: 0–100. Group average uses matching saved runs on this device, not an industry-wide norm.

Domain	Your score	Group average	Target
D1	78	Not available	82
D2	86	Not available	88
D3	72	Not available	84
D4	63	Not available	82
D5	70	Not available	78
D6	80	Not available	84

Group average: no matching saved-run data supplied. The grey line is not plotted. Target: the original sample's role reference, not a recalculated focused target.

Executive summary

Your sample profile shows a relative strength in using AI tools (D2: 86), supported by human–AI collaboration (D6: 80) and AI foundations (D1: 78). These are useful areas to build on. Risk, ethics and governance (D4: 63) has the largest gap to the role reference; evaluating AI outputs (D3: 72) is another area to consider. Choose your next step using these signals together with your work goals and experience.

Understand each domain → Reflect on your priorities → Compare courses

Sample report. Scores and the supplied 88% pilot confidence are unchanged; confidence is not a probability of job readiness. Role references are pilot targets. Domain scores do not establish every competency gap; competency-level evidence was not supplied.

What each domain means for your work

Six complementary skills for using AI effectively. A domain score is a starting point for reflection, not a verdict on every task you can perform.

D1 78 / 100

Understand what AI can and cannot do

Know how AI works, where it can fail and when it needs reliable information.

Why it matters: Helps you choose a suitable tool and set realistic expectations.

At work: Decide whether AI can draft a response or needs verified company information first.

D2 86 / 100

Use AI tools to get work done

Give clear instructions, choose tools and improve the results through iteration.

Why it matters: Helps turn an idea into a repeatable, useful way of working.

At work: Draft, review and refine a document or coding task with AI.

D3 72 / 100

Check whether an AI answer deserves trust

Question claims, check sources and recognize missing or misleading information.

Why it matters: Reduces the chance of acting on a confident but incorrect answer.

At work: Verify a cited fact, calculation or code suggestion before using it.

D4 63 / 100

Use AI responsibly and protect information

Consider sensitive data, fairness, permissions and the rules that apply to your work.

Why it matters: Helps reduce avoidable harm to customers, colleagues and the organization.

At work: Check whether customer data may be entered into a tool and who must approve the output.

D5 70 / 100

Choose AI work that creates useful value

Choose a worthwhile problem and define how you will judge the result.

Why it matters: Helps focus time and budget on improvements that matter.

At work: Compare time saved and output quality before and after an AI pilot.

D6 80 / 100

Work well with people and AI

Decide what AI does, what people review and who remains responsible.

Why it matters: Helps teams use AI without losing accountability or shared understanding.

At work: Agree on review steps and handovers when a team uses AI-generated work.

Your strengths. Your next priority.

Use the results to reflect on yourself, then choose a learning direction that fits your work. Horizon's suggestions are not a required sequence.

Build on relative strengths

D2 • 86: your highest score. Consider a more useful or more challenging AI workflow.

D6 • 80 and D1 • 78: potential foundations for working with AI and understanding its limits.

Reflect: Where have I already used these skills successfully? What work example supports my view?

Consider areas to develop

D4 • 63 vs reference 82: the largest gap (19 points). Consider responsible AI use and information handling if relevant to your work.

D3 • 72 vs 84: consider checking AI answers more reliably. D5 • 70 vs 78: consider choosing and measuring useful AI work.

Reflect: Which issue affects my work most now? Would I rather deepen a strength first?

Bring your own judgment into the choice

1. Choose one work goal or personal interest.
2. Pick the domain that helps—even if its score is high.
3. Compare course level, format, time, cost and access on pages 4–9.
4. Save your priority in the platform; other domains can wait.

My first learning goal: _____ Domain: _____ Why now? _____

These are relative score signals, not proof of workplace competence. A lower-scoring domain can be deferred; changing your learning order does not change your assessment results.

D1 • AI Foundations & Concepts

Compare the options for your goal. ChulaXL is one partner, not the only provider. You may start here, build on a strength, or choose another domain first.

Course / provider	Competency fit / coverage	Format / duration	Course fee	Level / language / entry	Availability / link
AI & ML Foundations ChulaXL • NEURON0129	High match: core concepts, GenAI mechanics, capability limits and context windows. Partial coverage; no advanced systems engineering.	2h 05m Online reference; partner format pending	Partner price / VAT: unconfirmed	Introductory fit; partner labels Intermediate. Thai outline; teaching language and prerequisites: confirm.	Partner access pending Dates / seats: unconfirmed **Official course details**
AI Companion: Getting to Know and Using AI for Life and Work AIS / Thai MOOC	High match: core AI concepts; objective 1 explains AI and everyday tools. Practical introduction, not deep model mechanics.	Online, self-paced 4 hours	Free MOOC listing; confirm access terms	Beginner; Thai listing. Public audience; audio not independently checked. Unit tests; certificate ≥70%.	Enrollment route listed; account needed. No closing date stated. **Official course details**

Choose your route

Choose ChulaXL for model concepts, RAG and context; choose AIS / Thai MOOC for a broader everyday-use introduction.

Reviewed 19 Oct 2026. Provider pages may be cached. Confirm current access, local price, dates and language before enrolling. A course listed here is not a reserved seat.

High match confidence means the published syllabus explicitly covers the named competency topic. Coverage remains partial; completion does not prove workplace competence. Partner status does not increase a course's ranking.

D2 • Practical Application & Tooling

Compare the options for your goal. ChulaXL is one partner, not the only provider. You may start here, build on a strength, or choose another domain first.

Course / provider	Competency fit / coverage	Format / duration	Course fee	Level / language / entry	Availability / link
Generative AI & Prompt Engineering ChulaXL • CHULAMOOC2654	High match: prompt design and output refinement, chapters 3–7. Introductory coverage; agent workflows are not demonstrated.	1h 16m Online reference; partner format pending	Partner price / VAT: unconfirmed	Introductory fit; partner labels Intermediate. Thai outline; teaching language and prerequisites: confirm.	Partner access pending Dates / seats: unconfirmed **Official course details**
Generative AI Foundations ARIT	High match: prompt design, tool selection and output refinement. Explicit prompt and refinement syllabus; basic level.	12 hours / 2 days Dec intake: Hybrid; venue to confirm	THB 8,500 excluding VAT (Dec form)	Basic; Thai listing. Confirm teaching language and prerequisites. Training with CCS exam.	29–30 Oct / 16–18 Dec 2026 listed. Dec dates conflict with "2 days"; confirm dates, format and seats. **Official course details**

Choose your route

Choose the short ChulaXL course for a focused refresher; compare ARIT if you prefer scheduled instruction and an exam. Confirm its intake details first.

Reviewed 19 Oct 2026. Provider pages may be cached. Confirm current access, local price, dates and language before enrolling. A course listed here is not a reserved seat.

High match confidence means the published syllabus explicitly covers the named competency topic. Coverage remains partial; completion does not prove workplace competence. Partner status does not increase a course's ranking.

D3 • Critical Evaluation & Judgment

Compare the options for your goal. ChulaXL is one partner, not the only provider. You may start here, build on a strength, or choose another domain first.

Course / provider	Competency fit / coverage	Format / duration	Course fee	Level / language / entry	Availability / link
Beyond the Obvious: How to Think in the Age of Generative AI IE Business School / Coursera	High match: data/chart judgment and claim verification. Modules cover causality, biased samples, misleading averages and claim-testing exercises. Not media-forensics training.	Online, self-paced Plan about 20 hours; module totals show 16 hours	Paid access / certificate; Thai checkout price unverified. Trial ≠ free completion.	Beginner; no experience required. English; Thai subtitles unverified. 25 assignments, some AI-graded.	Enroll action shown. Confirm Thailand account access and payment terms; no fixed intake stated. **Official course details**

Choose your route

Choose this for practice in evaluating evidence and data. If you prefer Thai-language or shorter learning, keep D3 on your plan while further suitable options are verified.

Reviewed 19 Oct 2026. Provider pages may be cached. Confirm current access, local price, dates and language before enrolling. A course listed here is not a reserved seat.

High match confidence means the published syllabus explicitly covers the named competency topic. Coverage remains partial; completion does not prove workplace competence. Partner status does not increase a course's ranking.

D4 • Risk, Ethics & Governance

Compare the options for your goal. ChulaXL is one partner, not the only provider. You may start here, build on a strength, or choose another domain first.

Course / provider	Competency fit / coverage	Format / duration	Course fee	Level / language / entry	Availability / link
AI Governance ChulaXL • CHULAMOOC2656	High match: regulatory/policy fluency, chapters 3–4. Governance awareness; not implementation of logs, permissions or incident response.	3h 42m Online reference; partner format pending	Partner price / VAT: unconfirmed	Introductory fit; partner labels Intermediate. Thai outline; teaching language and prerequisites: confirm.	Partner access pending Dates / seats: unconfirmed **Official course details**
Embrace responsible AI principles and practices Microsoft Learn • module	High match: regulatory/policy fluency and fairness/ethics. Objectives address principles and policies; governance unit covers ownership. Not Thai legal compliance advice.	Online, self-paced About 58 minutes / 9 units	Free learning content	Beginner; English. Basic AI and business knowledge. Sign in for assessment credit; not a certification exam.	Public learning units available. No cohort dates; Thai localization unverified. **Official course details**

Choose your route

Choose ChulaXL for broader governance and regulation context; choose the free Microsoft module for a shorter introduction to policies and organizational responsibilities.

Reviewed 19 Oct 2026. Provider pages may be cached. Confirm current access, local price, dates and language before enrolling. A course listed here is not a reserved seat.

High match confidence means the published syllabus explicitly covers the named competency topic. Coverage remains partial; completion does not prove workplace competence. Partner status does not increase a course's ranking.

D5 • Strategy & Value Realization

Compare the options for your goal. ChulaXL is one partner, not the only provider. You may start here, build on a strength, or choose another domain first.

Course / provider	Competency fit / coverage	Format / duration	Course fee	Level / language / entry	Availability / link
Chula AI-10: AI Competencies for Everyone ChulaXL • CHULAMOOC2653	High match: use-case evaluation, chapter 3. Short orientation; ROI measurement and portfolio prioritization are not established.	1h 52m Online reference; partner format pending	Partner price / VAT: unconfirmed	Introductory fit; partner labels Intermediate. Thai outline; teaching language and prerequisites: confirm.	Partner access pending Dates / seats: unconfirmed **Official course details**
AI For Everyone DeepLearning.AI / Coursera	High match: use-case evaluation and transformation strategy. Weeks 2–3 cover project selection and the transformation playbook. No detailed ROI-model practice shown.	Online, self-paced About 7 hours	Paid certificate; localized checkout price unverified. Provider pricing differs by access route.	Beginner; no experience required. Language/audio options vary by locale; confirm English/Thai. 4 assignments.	Enroll action shown. Confirm Thailand account terms. Business-oriented, not a coding course. **Official course details**

Choose your route

Choose Chula AI-10 for a brief use-case orientation; choose AI For Everyone for project selection and organizational strategy.

Reviewed 19 Oct 2026. Provider pages may be cached. Confirm current access, local price, dates and language before enrolling. A course listed here is not a reserved seat.

High match confidence means the published syllabus explicitly covers the named competency topic. Coverage remains partial; completion does not prove workplace competence. Partner status does not increase a course's ranking.

D6 • Human-AI Collaboration

Compare the options for your goal. ChulaXL is one partner, not the only provider. You may start here, build on a strength, or choose another domain first.

Course / provider	Competency fit / coverage	Format / duration	Course fee	Level / language / entry	Availability / link
Chula AI-10: AI Competencies for Everyone ChulaXL • CHULAMOOC2653	High match: human–AI role clarity, chapter 9. Role awareness only; not team handoff or accountability practice.	1h 52m Online reference; partner format pending	Partner price / VAT: unconfirmed	Introductory fit; partner labels Intermediate. Thai outline; teaching language and prerequisites: confirm.	Partner access pending Dates / seats: unconfirmed **Official course details**
Mentoring and Coaching with AI Skooldio	High match: learning/improvement loops through AI-assisted feedback, development plans and reflection. Best for managers; not general human–AI accountability training.	Online About 1h 28m listed video, plus practice	THB 1,990 listed; confirm VAT / checkout total	ChatGPT/Claude familiarity. Thai listing; audio to confirm. No HR/coaching background needed; certificate terms unverified.	Course listed; checkout untested. Individual lifetime / corporate 1-year access per FAQ. **Official course details**

Choose your route

Choose Chula AI-10 for human–AI roles; choose Skooldio if coaching people and planning their development are part of your work. AI-10 is the same course listed under D5; do not enroll twice.

Reviewed 19 Oct 2026. Provider pages may be cached. Confirm current access, local price, dates and language before enrolling. A course listed here is not a reserved seat.

High match confidence means the published syllabus explicitly covers the named competency topic. Coverage remains partial; completion does not prove workplace competence. Partner status does not increase a course's ranking.
